Tornadoes are very wild winds. You must stay far away from them. Tornado winds can blow up to 300 miles per hour. That is faster than a racecar. Most tornadoes happen during the spring when warm air and cool air meet. This kind of weather can create a tornado.

A slow tornado can break tall trees. A fast tornado may lift a house into the air. If a tornado comes, find a room with no windows. This is one of the best places to stay safe during a tornado.
